

BUILT FOR OUTDOOR EVENTS

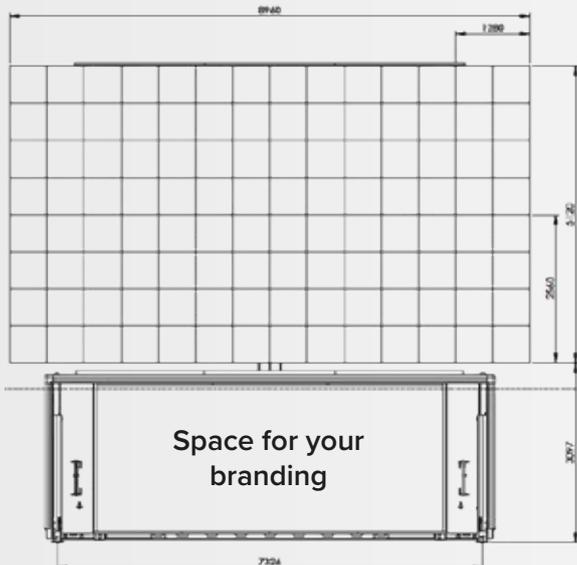

BDF LED CONTAINER

With an LED area of 8.96 × 5.12 m, the container delivers a powerful visual presence for any outdoor event. Thanks to its automated lift and rotating structure, setup under ideal conditions takes under one hour and can be managed by a single technician. A built-in diesel generator ensures fully independent operation, even where no electrical connection is available.

The mobile BDF LED Container enables fast, clean, and efficient setup, making it the perfect choice for open-air events and live broadcasts requiring a large LED display without complicated construction.

TECHNICAL PARAMETERS

Display area & specifications

LED screen: 8.96 × 5.12 m (16:9); pixel pitch: 6.6 mm

Content preparation

Recommended resolution: 1920 × 1080 px (Full HD, 16:9)

Supported media formats

Video: .mp4 (H.264 codec); alternative: .mov or .avi

Graphics: .jpg / .png (16:9 aspect ratio)

Weight & safety

LED container weight: 14 t

Total transport weight: 26 t

Safe operation ensured by **certified personnel** and continuous wind monitoring via an integrated anemometer.

Large projection surface

Rapid and seamless installation

Self-sufficient operation
